Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Mr. Amernick stressed that Sander discloses putties in his examples and he asserted that the material of Sander is not reconstitutable to form a hydrogel. He also argued that the reasons for allowance in the parent application stressed that Ron disclosed a putty and not a gel. The reexamination on the parent application also stressed this difference, and he pointed out that the examples of Sanders failed to mention particle size. Mr Amernick said that he was going to file arguments to that effect. The Examiner stated that he would have to consider these arguments in detail once the response is filed.
